Re: 85 Dover Road

Dear Board Members,

On behalf of the owner Kevin Foley of 85 Dover Road, we are requesting an Order of Conditions, to construct a new septic system. We are crossing a wetland area with a 1' wide trench approx 18' long with a 4" pvc sleeve and a 2" force line. The wetland crossing is through a grass swale. Erosion control will be placed during construction. All construction will be on the existing lawn. If you have any question please do not hesitate to call.

Thank You  
Paul DeSimone Representative
